

VON SCHRADER CHEMICALS

The complete range of von Schrader chemicals complements the Aridex and Esprit equipment:

Anti-Resoil Carpet Detergent

An anti-resoil High pH detergent concentrate formulated for professional Low Moisture Soil Extraction cleaning of all synthetic (man-made) fibre carpets. Blended to perform in Von Schrader Low Moisture Soil Extraction cleaning equipment, even with fairly hard water. Safe for use on stain resist carpet.

Anti-Resoil Carpet & Upholstery Detergent

An anti-resoil, Low pH Detergent for professional Low Moisture Extraction cleaning. Safely cleans wool, cotton, natural fibres and upholstery fabrics. With appropriate colour tests, Low pH Detergent can be used on the most valuable and delicate oriental or domestic carpet and upholstery. Woolsafe and Green Seal certified.

Spot Remover

A general spot remover, which is used to attack tar, gum and most food spots. Use straight from the bottle. Can be used for accidental clean up so that spot does not become a permanent stain. Spot Remover can also be used prior to cleaning to help loosen and loosen spots prior to their removal.

PRELIM™ Upholstery Pre-Spray Concentrate

A pre-spray specially formulated to loosen stubborn, heavy soil from even delicate upholstery fabrics. Has a pleasant citrus fragrance that will continue to linger after cleaning has been completed.

Leather Lather

Leather Lather has been pH balanced and formulated to effectively clean all types of smoothly, finished leather furniture and vehicle interiors. Also available in Leather Care Combo Pack.

Leather Lotion

Leather Lotion safely strengthens preserves and nourishes fine leather. It's a rich creamy liquid that is specially formulated for smooth, finished leather upholstery. Also available in Leather Care Combo Pack.

Fabric Protector

A fluorochemical based spray application to provide protection against dirt, grease and stains from spills on upholstery and other fabrics. Safe for all colourfast material. Quick drying time, fabrics back in use in 30 minutes.

Coffee Break

Formulated to quickly and easily remove new or old coffee and tannin stains that have not been removed by cleaning or use of other spot removers.

GITGO

Gum, Ink, Tar, Grease and Oil Remover effectively removes chewing gum, ink, tar, grease, oil, glue adhesives and other stubborn spots from carpet and upholstery. Contains a safe citrus solvent that changes from a liquid to a gel on contact.

DYE-OUT

Removes artificial or natural fruit juices, as well as food dye from carpet and upholstery. Removes Magic Marker, cosmetics and other food spots. Separates the food colouring from the stained fibre.

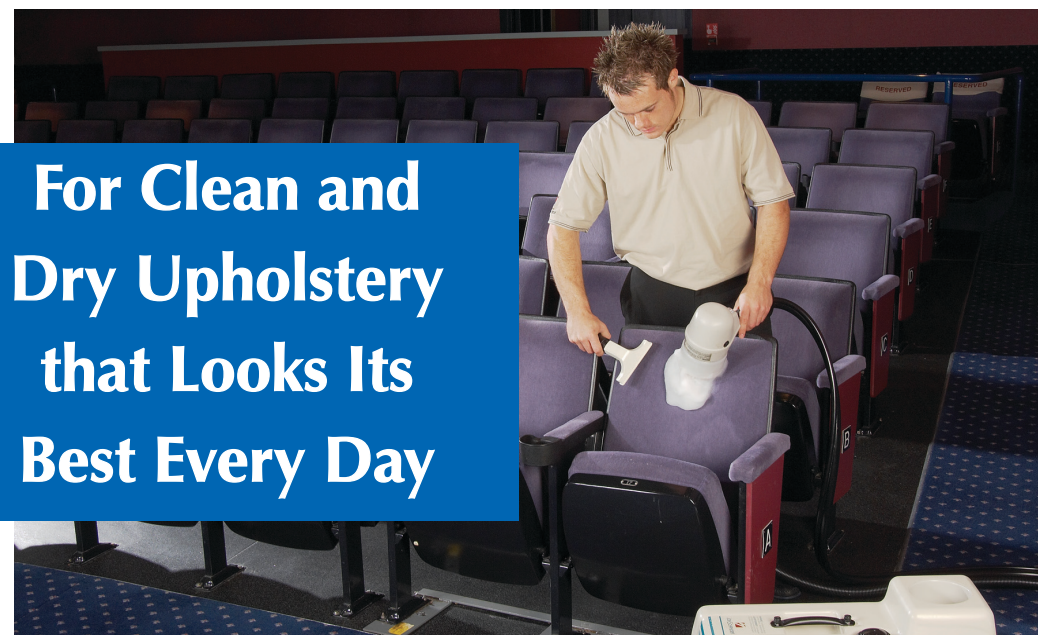

Haitian Cotton Detergent

An extremely dry foam detergent to safely clean Haitian Cotton or other fine fabrics without the damages of bleeding or browning. Prevents browning problems normally associated with over wetting. This also can be used for corrective measure for existing browning conditions.

For Clean and Dry Upholstery that Looks Its Best Every Day

The Aridex and Esprit systems are a better and drier way to clean upholstery, even leather. It's a simple and fast method for deep cleaning your upholstered furniture anytime without the inconvenience of getting it wet.

A unique combination of vacuuming, brushing and chemical technology means:

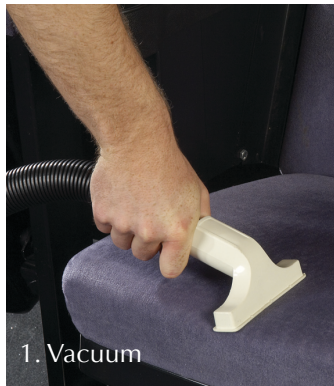

- No over wetting and never any shrinkage
- No sticky residue
- Results can be seen immediately
- Safe and easy to use
- Quick and productive system means lower labour costs
- Furniture can be dry and back in service in 30 minutes
- Great for cleaning stairs
- Low cost of chemicals

VONSCHRADER
Esprit

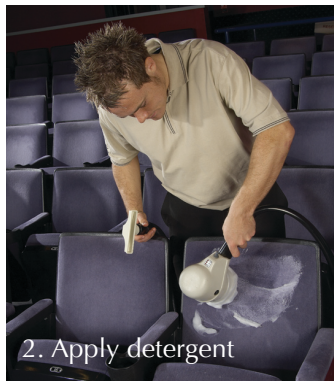

Great for cleaning most types of fabrics including:
velvet, jacquard, weaves, tapestry, brocades cotton, silk and leathers

ARIDEX
The Dry Upholstery Cleaning System

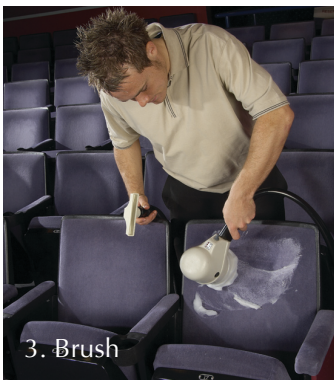

Jani-Clean Tel: 07951-088917

1. Vacuum

2. Apply detergent

3. Brush

4. Vacuum

THE CLEANING PROCESS

Our system incorporates 4 vital cleaning stages:

1. Using the integrated vacuum we extract surface dust and soil. An often neglected stage.
2. Then we apply detergent in the form of a high volume foam containing millions of cleaning bubbles.
3. The unique power head agitates and brushes the detergent through the upholstery. The unique counter rotating brushes in the head mean that there is no chance of distorting even the finest fabrics. The detergent bubbles dissolve, emulsify, and encapsulate the soil. The optional handle can make the operation easier.
4. The final stage is to use the vacuum to remove the soiled foam bubbles.

Alternative stiffer black brushes make short work of confined, difficult to get at carpet and VCT areas, stairs and stair nosings.

UPHOLSTERY CLEANING PLUS MUCH MORE

The system uses up to 93% less moisture compared with other water based systems and as a result fabrics do not get soaked through. The detergent is odourless, safe and biodegradable. It's also non sticky and this means that it will not contribute to any resoiling.

The systems are easy to handle, light and compact. Apart from upholstery they can be used in vehicle valeting, boat and aircraft interiors and even wall panels. High productivity makes either system ideal for the maintenance of mass seating areas such as theatres, cinemas, buses and trains.

Currently, many independent contractors, bus companies, at many airports and on London Underground, use either the Aridex or Esprit systems.

Make Upholstery cleaning a routine event rather than a special project. Your upholstery will look better and last longer. This is a low cost, low moisture safe and easy upholstery cleaning system.

Expensive re-upholstering can be postponed for years with this safe thorough cleaning method.

The difference between the two machines is simple:

The Aridex (right) has a much smaller footprint and has a less robust framework.

The Esprit (left) has a slightly higher powered motor but requires this to service the longer vacuum hose configuration.

If it's a machine to operate in largely confined spaces then you may choose the Aridex and in more open areas the Esprit.
